

DEVALVING TOOLS

C10 and CGA 600

C10
devalving tool

Premier devalving tools provide an effective tool to dislodge/disable valves on empty gas cylinders, thus providing the safe evacuation of excess gas before recycling or disposing of the cylinder.

CGA 600
devalving tool

We recommend devalving tools be used on empty cylinders, though ports on the devalving tool will allow any residual or excess gas to be expelled safely.

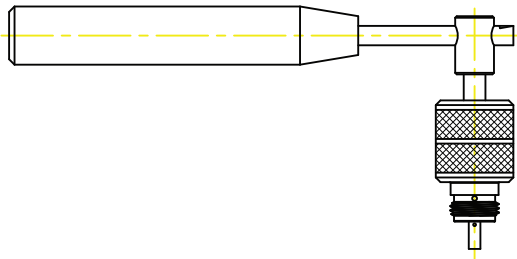

FEATURES

- C10 and CGA 600 connections available
- 303 stainless steel construction

SOME APPLICATIONS WILL REQUIRE A CUSTOM SOLUTION.
CONTACT PREMIER INDUSTRIES TO REQUEST A MODIFICATION
