

2610 SERIES

Single Stage, Stable Set Pressure, Piston Sensed
Pressure Reducing Regulators

The Premier 2610 Series single stage regulators are equipped with new patent pending technology that enables increased stability in delivery pressure and a significantly reduced decaying inlet characteristic in a single stage. Premier 2610 Series single stage, piston sensed, pressure reducing regulators feature a max inlet pressure of 3500 PSIG (*241.34 bar*), outlet pressures up to 2500 PSIG (*172.37 bar*), and Cv 0.20. Premier 2610 Series regulators are well suited for applications with high outlet pressures from a compressed gas source. Models are available for both corrosive and non-corrosive service featuring a variety of body, & seal options.
