PREMIER REGULATORS, VALVES, & GAS DELIVERY SYSTEMS FOR USE WITH HYDROGEN

INNOVATIVE DESIGNS FORMULATED FOR HYDROGEN.

Our H2 Series regulators and valves are optimized for use in hydrogen applications. All our regulators and valves are manufactured and tested to meet rigid industry specifications while keeping in mind the distinct needs and expectations of the customer.

It is our pleasure to provide and design solutions to meet the unique needs of hydrogen applications.

WE'RE EXPERIENCED AND RESPONSIVE.

Our customers know, if they have a question, they can pick up the phone and give us a call. No automated messaging systems here. We have a team of engineers with over 100 years of regulator design experience ready to assist you. We are always pushing for more sophisticated processes, working on leading-edge designs, while striving to remain personable and responsive.

ROBUST & VERSATILE DESIGNS.

Premier H2 Series regulators are designed with versatility in mind. Our Hydrogen regulators are offered in a variety of materials to resist Hydrogen embrittlement. Our H2 Hydrogen Series regulators are available with a variety of flow capacities, inlet/outlet pressure ranges, port sizes, and port types. Assemblies can be completed with optional relief valves and shut-off valves.

Premier Industries Hydrogen regulators are designed to provide maximum flexibility and compatibility to integrate seamlessly into your Hydrogen application.

FINDING A PRODUCT TO SUIT YOUR APPLICATION.

Not all systems are the same. "Off the shelf" products may not be acceptable for many applications.

If you do not see a standard Premier model that suits your needs, please contact us; we would be happy to help you with a custom design or modification.

Give us a call at 763.786.4020 or e-mail us at sales@premierind.us.

We are excited to work with you.

HYDROGEN
OPTIONS AND SERVICES

Products for pressure ratings up to
to 20000 PSIG (1379 BAR).

Optional laser etched parts.

Integrated sintered inlet filters to
extend service life for pressure
reducing regulators with $C_v \leq 0.2$
Optional external filters available
for $C_v 1.0$ and $C_v 2.0$ designs

A wide selection of regulators
with 316 stainless steel and SAE
360 brass bodies

A variety of mounting options to
integrate seamlessly into your
desired application: surface
mounting, panel nuts, panel
mounting brackets etc.

Optional laminar flow clean bench
assembly, testing, and packaging.

Dome and air-loaded regulators
for use with electro-pneumatic
controllers for precision and
automation.

Optional material certifications.

Captured venting and non-venting
designs
