

3016 SERIES

High Pressure, High Flow
Pressure Reducing Regulators

Premier 3016 Series regulators are high pressure high flow, piston sensed, pressure reducing regulators rated for inlet pressures up to 10000 psig / 689.5 bar (*dependent upon configuration*), and (Cv) 1.0 or 2.0. Premier 3016 series regulators feature a balanced stem design for increased outlet pressure stability.

Premier 3016 Series regulators are available in a variety of materials for seamless integration into your desired application. Common applications include: commercial diving, and high pressure tube trailers.

FEATURES

- Self-venting and captured venting models available (*non-venting modification also available*)
- Balanced stem for increased outlet pressure stability
- High flow capacity (Cv): 1.0 or 2.0
- Piston sensed
- Great sensitivity
- Optional gauge ports
- Machined bar stock body eliminates porosity found in castings

SOME APPLICATIONS WILL REQUIRE A CUSTOM SOLUTION.
